

## Instructions for Table C: ITFS Unconstructed Modifications and Conditional Licenses

These instructions are for reviewing *Table C: Instructional Television Fixed Service (ITFS) Unconstructed Modifications and Conditional Licenses* and submitting corrections to the data on this table.

This table of licensing information is provided in accordance with Public Notice DA 02-2751, released October 18, 2002.

### Table Organization

*Table C: ITFS Unconstructed Modifications and Conditional Licenses* is sorted by licensee name and contains the following information:

- Licensee Name
- Call Sign
- Facility ID
- Basic Trading Area
- Transmitter City/State,
- Facility Type – includes one of the facility codes listed below
  - IF: ITFS Station
  - IFB: ITFS High Power Booster Station
  - IFH: ITFS Response Station Hub
  - IFY: ITFS Downstream I Channel Station
- Status –includes one of the status codes listed below
  - CONDL: Conditional License
  - PRCAN: Permit Canceled
  - MODLI: Licensed, with a Granted Modification which has not been Constructed and Certified
- Latest License Status Date
- Construction Permit Expiration Date
- Renewal Expiration Date (The date the authorization expires absent the filing of a timely renewal application.)
- Channel List

### Section 1: Reviewing the Data in Table C

Review the data for your ITFS Unconstructed Modification or Conditional License in Table C.

#### A. Incorrect Statuses

If a valid ITFS authorization is not listed on Table C, or it is believed to be listed incorrectly (i.e., Canceled, etc.) the licensee must submit

- A copy of the authorization
- A declaration signed by an authorized representative of the licensee that the authorization is valid and has not been forfeited or canceled
- A cover letter that includes the following information:

- The Table to be corrected (Table C)
- The Call Sign
- The Facility ID, if known
- The Licensee's FCC Registration Number
- The current Name, Address and Phone number of the Licensee's Contact Representative

#### **B. Certification of Construction**

If a station is listed as a Conditional License (CONDL) or Unconstructed Modification (MODLI), and a Certification of Construction has been filed, the licensee should submit

- Two FCC date-stamped copies of that filing, or
- Other contemporaneous evidence demonstrating that a certification of construction was filed
- A cover letter which includes the following information:
  - The Table to be corrected (Table C)
  - The Call Sign
  - The Facility ID, if known
  - The Licensee's FCC Registration Number
  - The current Name, Address and Phone number of the Licensee's Contact Representative

#### **C. Reviewing Technical Parameters of the Stations Listed on Table C**

After you have reviewed the status of the authorization, access your license data by call sign or Facility ID using the BLS Inventory Search (<http://svartifoss2.fcc.gov/BlsQuery/inventory/LicenseSearch.html>). Follow the instructions posted at that site for searching the database and submitting corrections to the technical parameters of the license. If you have found that both the status and the technical parameters are in error, submit all corrections together in a single data correction filing.

If the status of the authorization is correct in Table C, and if the technical data provided at the BLS Inventory web site is correct, no further action is required.

### ***Section 2: Submission of Data Corrections***

Corrections to the status of a license and/or to the technical parameters must be submitted to the address listed below, and must be filed within the timeframe announced by Public Notice DA 02-2751, released October 18, 2002. All technical data corrections must comply with the instructions as noted at the BLS Inventory web site at (<http://svartifoss2.fcc.gov/BlsQuery/inventory/LicenseSearch.html>).

Federal Communications Commission  
MDS/ITFS Database Corrections  
1270 Fairfield Road  
Gettysburg, PA 17325
